Memo Van Star chassis mounted swing away bike carrier for Fiat Ducato

We fitted this excellent rack to our van from new in August 2020. It allows 2 bikes to be carried whilst still allowing full access to the rear doors of the van (see photos).

It was fitted by LNB Towbars but is a fairly simple DIY fit (pictorial instructions are available online). When not carrying bikes, the rack can be folded up reducing length, or the swing away portion of the rack can be removed completely without tools, leaving the chassis mounting in place.

I removed the rack from our van around 18 months ago due to a change in our bike usage, and it has been stored in my garage since.

The carrying capacity is up to 75kg, so ideal for a pair of electric bikes. The weight of the rack and chassis mount total around 45kg.

New price for the current version of this rack is around £1700 unfitted

This one can be yours for £500
